Automotive surface mount PTCs refer to surface mount resettable fuses used in automotive electronic systems. These fuses can automatically disconnect the circuit under overcurrent conditions and automatically resume conduction when the fault is removed, thereby protecting the circuit from overcurrent damage. Automotive surface mount PTCs are usually required to meet strict automotive industry standards, such as AEC-Q200, to ensure reliability in harsh environments such as high and low temperatures, humidity, and vibration. These fuses help improve the safety and reliability of automotive electronic systems, reduce maintenance costs, and improve vehicle performance.
