The global Automotive Thermostat market size is expected to reach \$ 4846 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

Automotive Thermostat is a temperature controlled on and off valve. When the temperature rises to a predetermined temperature, the thermostat opens up to allow the engine coolant to flow through the cylinder block and the radiator. This flow is crucial to maintain optimum operating temperature for fuel efficiency, enhanced drivability, and engine protection. The coolant flow is reduced when the engine is cold, and the flow is increased when the engine is hot.

Global Automotive Thermostat key players include Mahle, Temb, Stant, Borgwarner, etc. Global top four manufacturers hold a share over 10%.

China is the largest market, with a share about 20%, followed by China, and Europe, both have a share about 30 percent.

In terms of product, Insert Thermostat is the largest segment, with a share over 60%. And in terms of application, the largest application is Passenger Vehicle, followed by Commercial Vehicle.

This report studies the global Automotive Thermostat production, demand, key manufacturers, and key regions.
