Automotive Thread Coatings are specialized treatments applied to the threads of bolts, screws, and nuts used in vehicles to enhance their performance and reliability. These coatings serve various functions, such as reducing friction for easier assembly, providing resistance to vibration-induced loosening, offering corrosion protection, and ensuring leak-proof seals in critical joints. Common types include anti-seize, thread-locking, and self-sealing coatings. Widely used in engine components, chassis assemblies, and drivetrain systems, these coatings are essential for improving durability, safety, and efficiency in modern automotive manufacturing and maintenance.
