Automotive TPMS (Tire Pressure Monitoring System) service kits are a collection of tools and parts used to maintain and repair a vehicle's TPMS sensors. These kits typically include all the parts needed to install and replace TPMS sensors, such as valve stems, seals, hex nuts, valve cores, valve caps, and metal washers. These parts wear out over time, corrosion, pressure, and climate testing, and need to be replaced regularly to ensure the proper functioning of the TPMS system and the safety of the vehicle. TPMS service kits are essential to ensure the accuracy of the tire pressure monitoring system and the safety of the vehicle. As global regulations on TPMS systems become increasingly stringent, the use and maintenance of these service kits have become particularly important.
