## Abstracts

The global Automotive Transfer Case market size is expected to reach \$ 12810 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

Automotive Transfer Case is a part of the drivetrain of four-wheel-drive, all-wheel-drive, and other multiple powered axle vehicles. It is an aluminum or steel housing under the vehicle and the vast majority of transfer cases are either chain based or gear based. The transfer case transfers power from the transmission to the front and rear axles by means of drive shafts. It also synchronizes the difference between the rotation of the front and rear wheels, and may contain one or more sets of low range gears for off-road use.

Global Automotive Transfer Case key players include Magna, GKN, BorgWarner, Linamar, etc. Global top four manufacturers hold a share nearly 55%.

North America is the largest market, with a share about 40%, followed by China, and Europe, both have a share about 45 percent.

In terms of product, Chain Type is the largest segment, with a share about 80%. And in terms of application, the largest application is SUVs, followed by Light Trucks, etc.

This report studies the global Automotive Transfer Case production, demand, key manufacturers, and key regions.
