Abstracts

The global Automotive Turbochargers market size is expected to reach \$ 49060 million by 2032, rising at a market growth of 10.0% CAGR during the forecast period (2026-2032).

Turbocharger is a type of forced induction system. Turbocharger uses the exhaust flow from the engine to spin a turbine, which in turn spins an air pump, compressing the air flowing into the engine. Turbocharger lets the engine squeeze more air into a cylinder and more air means more fuel can be added. So the engine can produce more power without increasing the engine emissions. The turbocharger has four main components, the turbine, the compressor, the control system and the bearing system.

Global Automotive Turbochargers main players are Honeywell, BorgWarner, IHI, MHI, etc. Global top four manufacturers hold a share over 75%. Europe is the largest market, with a share nearly 40%.

This report studies the global Automotive Turbochargers production, demand, key manufacturers, and key regions.
