## Abstracts

The global Automotive Usage Based Insurance market size is expected to reach \$ 91510 million by 2029, rising at a market growth of 24.1% CAGR during the forecast period (2023-2029).

Usage-based insurance (UBI), also known as pay as you drive (PAYD), pay how you drive (PHYD) and mile-based auto insurance, is a type of vehicle insurance whereby the costs are dependent upon type of vehicle used, measured against time, distance, behavior and place. The company uses a telematics device — such as a plug-in device or mobile application — to track factors like your mileage and speed. If you're a safe driver, usage-based insurance could lower your auto insurance policy rates.
