According to our (Global Info Research) latest study, the global Automotive Vapor Emission Systems market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Automotive Vapor Emission Systems, also known as EVAP (Evaporative Emission Control) systems, are designed to capture and control the vapor emissions generated by gasoline and diesel-powered vehicles. These emissions primarily consist of volatile organic compounds (VOCs) that evaporate from the fuel tank and fuel system, contributing to air pollution and greenhouse gas emissions. The automotive vapor emission systems play a crucial role in reducing these harmful emissions, ensuring compliance with environmental regulations, and improving overall air quality.
