According to our (Global Info Research) latest study, the global Automotive Venting Membrane market size was valued at USD 185.8 million in 2023 and is forecast to a readjusted size of USD 231 million by 2030 with a CAGR of 3.2% during review period.

This report studies the Automotive Venting Membrane market, ePTFE Membrane has been widely used in automotive applications with a unique microporous structure. It comprises small randomly connected fibrils that render an effective pore size many times smaller than can be seen by the naked eye. Venting membrane microporous films are naturally hydrophobic and can be used as permeable water barriers for venting or breather filters for gas sensors, electronics and more.

Automobiles come equipped with complex electrical systems and devices, such as front and rear lights, in-car electronics, among many other key parts. ePTFE Membrane protect these sensitive components from condensation, heat dissipation, low air-flow issues, and more.

The report analysis venting membrane ready to use product. (Molded plastic cap is not covered in the report as product)

The main markets for automotive ventilation film are China and North America, both accounting for about 25%.

The main manufacturers are Gore, Clarcor, Microvent, Donaldson, etc., with the top three accounting for about 60%.
