AEB system is an active safety system that is incorporated in vehicles for automatic braking without the involvement of the driver. AEB system helps in avoiding collisions with other vehicles or pedestrians.

Scope of the Report:

This report focuses on the Autonomous Emergency Braking (AEB) System in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Passenger Vehicles (PV) are projected to lead the market of autonomous emergency braking (AEB) system by vehicle type, in terms of value. Higher safety concerns among passenger car users and larger volume of passenger vehicles versus commercial vehicles have led to this growth.

Low Speed-City AEB systems shall lead the AEB system market by operating speed. This can mainly be attributed to the high vehicle density and accidents in city-like road conditions compared with those in inter-urban road conditions.

The worldwide market for Autonomous Emergency Braking (AEB) System is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
