## Abstracts

According to our (Global Info Research) latest study, the global Autonomous Sweeper market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Autonomous sweeper is a type of urban sanitation vehicle.

Autonomous sweepers mainly use self-driving sweepers to replace traditional sanitation vehicles to achieve road cleaning on open roads or closed roads.

At present, the price of Autonomous sweepers is on the high side, and compared with traditional manpower, the price advantage is not obvious. In the future, with the localization and large-scale production of key components (such as lidar), the cost of Autonomous sweepers is expected to decrease. At the same time, with the commercialization of L4 level autonomous driving technology, labor costs will further decline, and Autonomous sweepers are expected to be promoted and used on a large scale.

The Global Info Research report includes an overview of the development of the Autonomous Sweeper industry chain, the market status of Business Park (Small Sweeper, Large Sweeper), Municipal (Small Sweeper, Large Sweeper), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Autonomous Sweeper.
