## Abstracts

Autonomous Underwater Vehicles (AUV) is the unmanned underwater vehicles which are operated without direct human intervention. They are being designed to perform underwater survey missions required in commercial, scientific research, and defense sectors. They are capable of carrying out an entire mission independently and return to the pre-programmed location where the data is collected and analyzed. Autonomous underwater vehicles are used in key application areas in commercial, scientific research, and defense.

### Scope of the Report:

This report focuses on the Autonomous Underwater Vehicles in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Among all applications, the autonomous underwater vehicle market for archeological and exploration applications is expected to grow at the highest rate between 2017 and 2023. However, military & defense applications are expected to hold the largest share of the autonomous underwater vehicle market in 2017.

The market for large AUVs is expected to grow at a high rate between 2017 and 2023. Large AUVs can operate at a depth of more than 1,000 meters and are widely used for hydrographic exploration, deep ocean search, and deep water surveys.

The worldwide market for Autonomous Underwater Vehicles is expected to grow at a CAGR of roughly 12.8% over the next five years, will reach 74 million US\$ in 2023, from 36 million US\$ in 2017, according to a new GIR (Global Info Research) study.
