Abstracts

The global AV-over-IP Distributed AV/KVM Management Platform market size is expected to reach \$ 3819 million by 2032, rising at a market growth of 6.7% CAGR during the forecast period (2026-2032).

An AV-over-IP Distributed AV/KVM Management Platform is a networked audiovisual and human-machine interaction management system used in control rooms, command centers, professional AV projects, multi-screen collaboration spaces, and mission-critical operations environments. The platform typically consists of AV encoders, decoders, KVM-over-IP endpoints, centralized management servers, control software, video wall management modules, user-rights management, and monitoring tools. It transports HDMI, DisplayPort, DVI, SDI, USB, keyboard-and-mouse, audio, serial, and control signals over Ethernet, fiber, or dedicated IP networks, enabling source acquisition, compressed or visually lossless transmission, matrix switching, live preview, video wall display, cross-screen mouse roaming, multi-operator collaboration, permission assignment, preset scenarios, and device health monitoring. This study focuses on hardware and software platforms centered on AV-over-IP, KVM-over-IP, distributed encoding/decoding, and video wall management for applications such as public safety command centers, traffic operations, utilities, enterprise NOCs/SOCs, broadcast facilities, meeting centers, education, and large campuses.

Based on our research, a distributed integrated management platform in the professional AV context should be understood as a control-room infrastructure layer rather than a generic management software category. Its core function is to manage audiovisual signals, KVM operator positions, video wall layouts, permissions, previews, routing, and operational presets across an IP-based architecture. This makes the

category fundamentally different from distributed energy management, cloud resource management, generic IT monitoring, video surveillance VMS, or standalone conferencing systems. The market boundary should therefore be defined around AV-over-IP, KVM-over-IP, distributed encoding and decoding, video wall management, and control-room visualization.

From a product and technology perspective, the industry will remain multi-route rather than converging immediately into one protocol or architecture. 1GbE compressed AV-over-IP, 10GbE visually lossless systems, fiber KVM, SDVoE, IPMX, and ST 2110-related architectures will coexist across different performance tiers. Lower-cost commercial AV projects prioritize ease of deployment and network compatibility, while mission-critical applications emphasize latency, redundancy, security, visual quality, and operational rights management. As a result, the competitive center of gravity is moving from hardware endpoints alone toward software control, system orchestration, interoperability, monitoring, and lifecycle management.

This report studies the global AV-over-IP Distributed AV/KVM Management Platform demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for AV-over-IP Distributed AV/KVM Management Platform, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of AV-over-IP Distributed AV/KVM Management Platform that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global AV-over-IP Distributed AV/KVM Management Platform total market, 2021-2032, (USD Million)

Global AV-over-IP Distributed AV/KVM Management Platform total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: AV-over-IP Distributed AV/KVM Management Platform total market, key domestic companies, and share, (USD Million)

Global AV-over-IP Distributed AV/KVM Management Platform revenue by player, revenue and market share 2021-2026, (USD Million)

Global AV-over-IP Distributed AV/KVM Management Platform total market by Type, CAGR, 2021-2032, (USD Million)

Global AV-over-IP Distributed AV/KVM Management Platform total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global AV-over-IP Distributed AV/KVM Management Platform market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Crestron Electronics, Inc., Extron Electronics, Samsung Electronics Co., Ltd., Barco NV, Black Box, Q-SYS, Datapath Ltd., ATEN International Co., Ltd., Guntermann & Drunck GmbH, IHSE GmbH, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world AV-over-IP Distributed AV/KVM Management Platform market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
