According to our (Global Info Research) latest study, the global Aviation Chemicals market size was valued at US\$ 7538 million in 2024 and is forecast to a readjusted size of USD 10160 million by 2031 with a CAGR of 3.9% during review period.

Aviation chemicals are specially designed and produced chemicals which are used while manufacturing, testing and maintenance of aircraft. The aircrafts are exposed to severe climatic conditions and temperature changes, which may lead to metal corrosion or malfunctioning of components. These chemicals are mainly used for coating, polishing, corrosion control, pest control, environmental maintaining, etc. in aircrafts, which help smooth functioning of aircrafts by increasing various physical and chemical characteristics of its components.

Globally, the main manufacturers and sellers of aviation chemicals are Cee-Bee, Henkel, PPG, Celeste, Chemetall and other large international companies that have formed a scale. These companies have strong R&D capabilities and production and supply capabilities, and occupy an important position in the market.

Growth drivers:

Rapid development of the aviation industry: With the growth of the global economy and the continuous prosperity of the aviation industry, air transport volume continues to increase, driving the growth of the aviation chemicals market.

The rise of emerging markets: The aviation industry in emerging markets such as Asia and Africa is developing rapidly, and the demand for aviation chemicals is also

increasing.

Maintenance demand caused by aging aircraft: As the aircraft are used for longer, the demand for maintenance and refurbishment of old aircraft is also increasing, providing a new growth point for the aviation chemicals market.
