Abstracts

The global Avocado Oil market size is expected to reach \$ 1425 million by 2032, rising at a market growth of 7.4% CAGR during the forecast period (2026-2032).

Avocado oil is a natural, edible oil derived from the pulp of avocado fruit through pressing or extraction processes. It is widely used in culinary applications, both as a cooking oil and as a flavorful ingredient in various dishes due to its high smoke point and nutrient-rich profile. Beyond food uses, avocado oil plays a significant role in non-edible applications, particularly in cosmetics and skincare, where it is prized for its hydrating, regenerative, and anti-inflammatory properties. Its versatility has made it a sought-after product across multiple industries.

Market Trends

The global avocado oil market has experienced significant growth due to increasing consumer awareness of health benefits and rising demand for natural products. Key players, including Sesajal, Olivado, and Ahuacatlan Avocado Oil, dominate the market, with the top three manufacturers accounting for about 20% of the global share. Geographically, Mexico leads production and consumption, holding over 30% of the market share, followed by South America and Africa, which together contribute another 30%. This regional distribution reflects the proximity to avocado-growing regions, ensuring a steady supply.

Segment Analysis

Refined avocado oil is the dominant product type, accounting for over 55% of the market share, attributed to its versatility in both food and non-food applications. Its

neutral flavor and high smoke point make it popular for cooking and frying. In terms of application, edible oil remains the largest segment due to its widespread use in households and the food service industry. Meanwhile, the cosmetics and skincare sector is also expanding, driven by the growing preference for natural ingredients in beauty products, highlighting avocado oil's multifunctional potential.
