The global Axle & Propeller Shaft market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Axle & Shaft is a mechanical part that translates the torque generated by a vehicle's engine into usable motive force to propel the vehicle. Axle & Shaft can be divided into propeller shaft, Rear Axle and Front Axle. The propeller shaft deliver power from an engine/transmission to the other end of the vehicle before it goes to the wheels. It is used on front engine rear wheel drive and most 4 wheel drive vehicles it couples the transmission with the rear differential. There is also a pair of shorter drive shafts often used to carry torque from a transaxle to the wheels. It is used in all kinds of vehicles and the number of half shafts varied with the drive mode.

In this report, the data we provide is about both the propeller shafts and half shafts.

In the Indian market, the major producers are GKN, AAL, NTN, Dana, Nexteer, GNA Enterprises, Sona Group, Hyundai-WIA, Talbros Engineering and AAM.
