Date: June 2026

Pages: 88

Price: US\$ 3,480.00 (Single User License)

ID: G588BC83EBC6EN

Abstracts

According to our (Global Info Research) latest study, the global Azilsartan Kamedoxomil API market size was valued at US\$ 186 million in 2025 and is forecast to a readjusted size of US\$ 269 million by 2032 with a CAGR of 5.4% during review period.

Azilsartan Kamedoxomil API is a prodrug of a new generation of angiotensin II receptor antagonists (ARB class) used for the treatment of hypertension. Its structural feature is that it can improve oral absorption rate and be converted into the active ingredient valsartan in the body, thereby exerting a stronger antihypertensive effect. This active pharmaceutical ingredient belongs to the high-end cardiovascular API of multi-step organic synthesis, with complex production processes and high requirements for impurity control, crystal stability, and registration standards. It usually meets international pharmacopoeia standards such as USP/EP. In 2025, global Azilsartan Kamedoxomil API production reached approximately 123 MT, with an average global market price of around US\$ 1,468 per kg. The annual production capacity of azilsartan kamedoxomil API is 180 tons, with a gross profit margin of about 30%.

Upstream raw materials: indazole/imidazole heterocyclic intermediates; Medoxomil esterification reagent (key structural source); Potassium salt reagents (KOH, etc.); Organic solvents (DMF, acetonitrile, methanol); Catalysts and protective reagents.

Downstream: Mesartan potassium tablets (anti hypertensive).

Raw material costs account for 45% -60%; Manufacturing cost accounts for 15% -25%; Quality control and compliance costs account for 8% -15%; Environmental protection and safety costs account for 5% -10%; R&D and process optimization account for 5%

-10%.

The active pharmaceutical ingredient of azilsartan kamedoxomil API belongs to the growth segment of high-end ARB generic drugs. Its market demand is driven by the stable growth of the global hypertension patient base, while benefiting from the trend of ARB drugs upgrading from older generation products such as losartan and valsartan to the new generation of highly effective drugs. The current market is still in the transitional stage of 'original research and development oriented imitation and mass production', and Chinese and Indian companies are gradually entering the commercial supply system. However, the overall competitive landscape has not been fully saturated, so the price and profit levels are higher than traditional sartan APIs. The core competitive points of the industry lie in registration access (DMF/ANDA), optimization of synthesis processes, and the ability to control large-scale costs. In the long run, it has stable demand and moderate growth potential, and belongs to the 'high-end upgraded raw material drug market in mature therapeutic fields'.

This report is a detailed and comprehensive analysis for global Azilsartan Kamedoxomil API market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Azilsartan Kamedoxomil API market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/kg), 2021-2032

Global Azilsartan Kamedoxomil API market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/kg), 2021-2032

Global Azilsartan Kamedoxomil API market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/kg), 2021-2032

Global Azilsartan Kamedoxomil API market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/kg), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Azilsartan Kamedoxomil API

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Azilsartan Kamedoxomil API market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Takeda Pharmaceuticals, LGM Pharma, Zhuhai Rundu Pharmaceutical, Hefei Lifeon Pharmaceutical, Guangzhou Standard Pharma, Jiangxi Synergy Pharmaceutical, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Azilsartan Kamedoxomil API market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.
