## Abstracts

The global B2B Central Air Conditioning market size is expected to reach \$ 65420 million by 2029, rising at a market growth of 4.1% CAGR during the forecast period (2023-2029).

The global market for Commercial Central Air Conditioning is dominated by a few large vendors having substantial budgets for research and development of new technologies and innovative products. Companies such as Daikin, Gree, Midea, Johnson Controls, and Carrier command prominent positions in the global market owing to their strong geographic presence, excellent distribution networks, and the financial power to acquire developers across the globe. Daikin, Carrier, and Gree, as the leaders in the domestic air-conditioning industry, have always been in the leading position in the field of central air-conditioning. At this stage, the market share of the top three manufacturers in the world accounts for about 32.57%.

Central air conditioners are more efficient than room air conditioners as well as easy and convenient to operate. Benefiting from the accelerated urbanization process and the rapid development of the international economy, a batch of large commercial office buildings, hotels, shopping malls, etc. have emerged, giving commercial central air-conditioning a huge market space.

B2B Central Air Conditioning is a system in which air is cooled at a central location and distributed to and from rooms by one or more fans and ductwork. The work of the air conditioner compressor is what makes the whole process of air conditioning possible.
