Abstracts

The bottle sterilizer is a device that is specially used to sterilize baby bottles. This type of device is also called baby bottle sterilizer or bottle sterilizer. The disinfection method has evolved from the traditional water disinfection to steam sterilization and microwave oven disinfection. The "GB14934-94 tableware disinfection standards" includes two types of disinfection: thermal disinfection and decontamination. The disinfection effect and safety of these two disinfection methods have been rigorously verified and are widely used. Among them, the bottle sterilizer is suitable for steam sterilization of 100°C steam or 100°C boiling for 10 minutes.

Scope of the Report:

This report focuses on the Baby Bottle Sterilizers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Vendors are increasingly focusing on gaining more market share, portfolio extension, and technology innovation to innovate their product offerings, which in turn, is resulting in product premiumization. For instance, vendors have introduced one of the latest technologies, smart connectivity, in bottle sterilizer to send alerts and control and monitor the baby bottle warmers from anywhere in the house. Similarly, vendors have come up with multifunctional bottle sterilizers. The baby care products market is a sensitive market due to the emotional value attached to such products, including baby bottle sterilizers. Parents are always concerned about getting the best and safest products for their children. Thus, marketing strategies involve emotional appeal rather than logical and point-based appeals. Developing countries have witnessed rapid urbanization over the past ten years, which has led to a rise in dual-income households

as well as disposable income. The number of working women have also increased. As a result, awareness and spending on baby bottle sterilizers has also increased worldwide. All these factors have been playing a pivotal role in propelling the baby bottles sterilizers market.

The worldwide market for Baby Bottle Sterilizers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
