## **Abstracts**

Baby food packaging products are specially designed for packaging food material for infants and toddlers. A wide variety of packaging materials such as glass jars, plastic containers, metal cans, folding cartons, and flexible packaging are used for packaging baby food products, including dried foods, prepared foods, and milk formula.

### **Scope of the Report:**

This report focuses on the Baby Food Packaging in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The increasing demand for baby food maker drives the market. High birth rate, increasing consumer awareness, and increasing number of working women are the factors driving the demand for baby food packaging solutions. The growing consumer preference for eco-friendly pouch packaging has increased the adoption for flexible packaging. Another factor augmenting the need for packaging solutions is the innovation led by baby food manufacturers, to meet varying consumer needs. Companies are increasingly using sustainable and recyclable packaging materials. They are constantly looking for green, innovative, and recyclable alternatives of normal packaging. Rapid urbanization coupled with increasing hectic lifestyle is expected to drive the product demand in economies such as the U.S., India, Brazil, and Vietnam. Increased disposable income coupled with rising demand for milk products is also expected to drive the food packaging demand over the forecast period. The worldwide market for Baby Food Packaging is expected to grow at a CAGR of roughly 6.9% over the next five years, will reach 80600 million US\$ in 2023, from 54000 million US\$ in 2017, according to a new GIR (Global Info Research) study.
