Abstracts

Baby movement monitors sense the movements of a baby such as or breathing and set off alarms in the absence of movements after a certain duration. The adoption of baby movement monitors is increasing worldwide due to the introduction of new formats with additional features.

Scope of the Report:

This report focuses on the Baby Movement Monitor in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The increasing demand for baby movement monitor drives the market. Rising innovations in product features and designs to be one of the primary growth factors for the baby movement monitor market, especially for its convenience and accuracy. These movement monitors track the movements and breathing of the baby, while enabling the parents to focus on other chores while simultaneously tracking the baby. Additionally, other factors such as rise in disposable income and parent awareness toward children safety are also vital. EMEA is estimated to be the major revenue contributor for the baby breathing monitor market throughout the forecast period. This region experiences steady growth owing to the growing population and rising working women that drive the demand for baby sleep monitors in the upcoming period.

The worldwide market for Baby Movement Monitor is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
