Abstracts

Baby safety products include baby strollers and prams, baby monitors, baby cribs, and baby car seats. Baby strollers and prams and baby car seats are of different types depending upon the weight and age of a baby. With latest advances, the baby gear technology is making it easier for parents to carry infants and babies comfortably and conveniently. Baby monitor is a device used for transmitting sound and video images from one room to another, to keep a tab on a baby's activities in case parents are not around. Baby crib is an infant bed used to leave baby safe in bed and prevent from falling while escaping the bed. All these products are used to provide comfort to babies while traveling or when parents are not around.

Scope of the Report:

This report focuses on the Baby Safety Products in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The increasing demand for baby safety products drives the market. Improved product quality, technical advancement, rise in disposable income and government support are key factors contributing to the growth of market. Improved product quality is a key trend that is expected to influence market growth during the forecast period. Governments are placing stringent rules and regulations regarding baby safety products for enhanced protection. These regulations mandate proper quality checks before installation of baby safety products. Introduction of specificity and multi-functionality of baby strollers is another trend that is expected to drive the market during the forecast period.
