## Abstracts

The global Baby Walking Harness market size is expected to reach \$ 237 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

A baby walking harness is a supportive device designed to assist infants and toddlers as they learn to walk independently. It typically consists of adjustable straps and handles that allow caregivers to support the child's torso and provide stability while allowing the child to practice walking movements. The harness is worn by the child, with the straps adjusted to fit snugly but comfortably around their torso. The caregiver can then hold onto the handles or straps to guide and support the child as they take steps. Baby walking harnesses are often used as a transitional aid between crawling and walking, helping children build confidence and coordination as they develop their walking skills. These harnesses are sometimes preferred over traditional baby walkers because they offer more control and safety for both the child and the caregiver. In 2025, global Baby Walking Harness production reached approximately 17,000 k units, with an average global market price of around 10 US\$/ Unit. The production capacity of Baby Walking Harness reaches 22,000 k units, and the industry's gross profit margin is approximately between 30% and 50%.

The Baby Walking Harness market is driven by increasing parental focus on child safety, mobility support, and early developmental assistance during the toddler stage. As more families live in urban environments with crowded public spaces, parents seek products that help prevent falls, reduce wrist strain from hand-holding, and provide better control in high-traffic areas such as shopping malls, airports, and parks. Rising awareness of ergonomic baby products and early motor-skill development further supports demand, as walking harnesses are positioned as tools that encourage balance and confidence while minimizing injury risk. The growth of dual-income households and

active lifestyles has also increased spending on practical child safety accessories. In addition, expansion of e-commerce platforms and social media parenting communities has improved product visibility and cross-border brand reach, while innovations in breathable materials, anti-lost leash designs, and multifunctional backpack-style harnesses continue to stimulate steady market growth.

This report studies the global Baby Walking Harness production, demand, key manufacturers, and key regions.
