## Abstracts

Braces and back support are used to provide relief to individuals with musculoskeletal disorders, especially in the older and middle-aged population. They are also gaining popularity among athletes where majority of injuries are related to lower-back or the spine. To keep up with the evolving needs of the customers, vendors are offering products with ergonomic designs that are made of comfortable and breathable materials.

### Scope of the Report:

This report studies the Back Support market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Back Support market by product type and applications/end industries.

The increasing number of sports injuries is one of the major growth drivers for the back support market. Most athletes face chronic pain in the event of lumbar spine injury due to excessive physical activities. Lower back and spine injuries account for the majority of the athletic injuries. Over 69% of all adolescent athletes go through lumbar spine and back injuries, whereas, adult athletes report discogenic disorders and muscle strain due to axial loading, twisting, and repetitive hyperextension, which leads to acute lower back pain. These factors lead to more demand for back support belts, which further drive the market for back support for treating sports injuries. APAC is expected to be the fastest-growing region in the market during the forecast period.

The global Back Support market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in

China, also fast growing India and Southeast Asia regions. North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Back Support.
