According to our (Global Info Research) latest study, the global Baggage Conveyor System market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Baggage conveyor system has important role in efficient operational activities at the airport. Baggage conveyor runs from baggage collection to loading and unloading from aircrafts till the baggage pickup point. Deposited bags go through bag manager for loading, reconciling, tracking, tracing, and managing baggage related operations. The rising trend of smart airport construction has induced installation of baggage conveyor that reduced the operations time and increased the efficiency, which in turn helped to generate big profit. Baggage conveyors are installed to avoid mishandling of baggage.

There is a rising trend of information exchange regarding the location of passenger's baggage. Airports worldwide are investing install system for central baggage reconciliation and handling. Developments are seen in the areas of end-to-end baggage capability (eBC) for tracking and messaging the baggage location. Efficient baggage conveyor system is an important aspect in the successful implementation of this system.
