Abstracts

According to our (Global Info Research) latest study, the global Ball Grid Array (BGA) PCB market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The PCB used for placing the BGA components is known as BGA PCB. It contains similar connections, just like the ball grid array present on the back of the BGA package. The component is placed over the PCB and then soldered. After soldering, the package looks as if it is pasted on the board with glue. There are no leads or connections on the side of the BGA package, and it makes the PCB more reliable and offers many benefits.

According to our Semiconductor Research Center, the global total output value of PCB was about US\$ 81 billion in 2022. With strong drivers from new technology, such as AI, 5G and new energy vehicles, it is estimated that the PCB industry will continue to grow steadily in the next six years. Global PCB manufacturers are mainly located in China mainland, China Taiwan, Japan, South Korea, Europe and the United States. Among them, Chinese local PCB companies hold the biggest share.
