Ball screw can be used in automobile electric brake mechanism. Automotive electric brake booster products are mainly composed of stroke sensors, pedal simulators, motors, controllers, double-stage reduction gear mechanisms, ball screw transmission mechanisms, housings, and brake master cylinders. The mechanism adopts the transmission method of double-stage reduction gear and ball screw. The double-stage gear adopts the compound transmission design of injection-molded gear and powder metallurgy gear, which not only improves the transmission strength, but also ensures the service life under long-term and heavy-load conditions. Transmission noise; by adopting the ball screw transmission mechanism, the transmission efficiency is increased from about 70% to more than 80%.

Global 3 largest manufacturers of Ball Screws for Car Electric Brake are NSK, NTJ and JTEKT. Among them, NSK is the leader with about 70% market share.
