Abstracts

The global Ball Screws market size is expected to reach \$ 3374 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

A ball screw is a mechanical linear actuator that translates rotational motion to linear motion with little friction. A threaded shaft provides a helical raceway for ball bearings which act as a precision screw. As well as being able to apply or withstand high thrust loads, they can do so with minimum internal friction. They are made to close tolerances and are therefore suitable for use in situations in which high precision is necessary.

Global key players of Ball Screws include THK, NSK, Hiwin, SKF, etc. The top four players hold a share over 47%. Asia-Pacific is the largest market, with a share about 61%, followed by Europe and North America, with share 23% and 15%, separately. In terms of product type, Internal Circulation Ballscrew is the largest segment, occupied for a share of 65%. In terms of application, Machine Tools and Injection Molding Machines is the largest, which has a share about 43 percent.

This report studies the global Ball Screws production, demand, key manufacturers, and key regions.
