Abstracts

The global Ball Screws market size is expected to reach \$ 3310.4 million by 2029, rising at a market growth of 5.6% CAGR during the forecast period (2023-2029).

The global key manufacturers of ball screw market are NSK, THK, SKF, Hiwin, and TBI MOTION, etc. The top five companies account for about 55% of the global market share. Asia Pacific has the largest consumption market with 60% of the market share. In terms of product, internal circulation ball screw is the largest segment, with about 63% market share.

A ball screw is a mechanical linear actuator that translates rotational motion to linear motion with little friction. A threaded shaft provides a helical raceway for ball bearings which act as a precision screw. As well as being able to apply or withstand high thrust loads, they can do so with minimum internal friction. They are made to close tolerances and are therefore suitable for use in situations in which high precision is necessary.
