## Abstracts

According to our (Global Info Research) latest study, the global Ball Valve market size was valued at USD 13560 million in 2023 and is forecast to a readjusted size of USD 13470 million by 2030 with a CAGR of -0.1% during review period.

A ball valve is a device with a spherical closure unit that provides on/off control of flow. The sphere has a port, also known as a bore, through the center. When the valve is positioned such that the bore is aligned in the same direction as the pipeline, it is in open position and fluid can flow through it. When rotated 90 degrees, the bore becomes perpendicular to the flow path, meaning the valve is closed and the fluid cannot pass through.

Global Ball Valve key players include Tyco International, Emerson Electric, Flowserve, Kitz, IMI plc, etc. Global top five manufacturers hold a share over 10%.

China is the largest market, with a share over 40%, followed by US and Europe, both have a share about 50%.
