## Abstracts

The global Ball Valve market size is expected to reach \$ 21184 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

In 2025, global Ball Valve production reached approximately 198,940 K units, with an average global market price of around 75 US\$/unit.

A Ball Valve is a rotational motion valve that uses a hollow, perforated spherical ball to regulate the flow of fluid or gas. When the ball is rotated 90 degrees, the aligned port with the pipeline allows full flow, while a perpendicular position completely shuts it off. Characterized by quick operation, tight sealing, low fluid resistance, and ease of maintenance, it is widely applied in industrial and civil systems to control media such as water, oil, gas, and corrosive liquids, making it a core component in fluid control systems.

Demand is driven by global infrastructure construction, the rapid expansion of the oil & gas and petrochemical industries, the growing modernization of water treatment and municipal engineering, as well as the increasing penetration of ball valves in high-corrosion, high-temperature, and high-pressure scenarios. As industries prioritize safety, reliability, and energy efficiency, ball valves with features like fire safety design, long service life, and low leakage are replacing traditional gate/butterfly valves in key applications. Business opportunities lie in upgrading products to meet stringent industry standards, developing specialized ball valves for harsh environments (e.g., corrosive media and cryogenic conditions), expanding into emerging markets' infrastructure projects, and leveraging smart manufacturing to integrate IoT-enabled monitoring and automation functions into valve systems for aftermarket and industrial digitalization needs.

This report studies the global Ball Valve production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Ball Valve and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
