Abstracts

Ballistic composites are a combination of two or more materials with different properties different. These materials have a high stiffness and tensile strength, low density, high thermal and electrical conductivity, and adjustable coefficient of thermal expansion. They are also resistant to corrosion and are stable at high temperatures.

Scope of the Report:

This report focuses on the Ballistic Composites in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
