## Abstracts

Ballistic has two different meanings when it comes to fabric. First, it can mean the type of material used for soft body armor. These materials are usually woven with high-strength fibers, such as a para-aramid, a high-performance polyethylene (HPPE) or high-modulus polyethylene. Those types of ballistic fabrics have a very specific end use, however. Lower-tech ballistic fabrics are those that are traditionally used in soft-sided luggage and backpacks.
