## Abstracts

According to our (Global Info Research) latest study, the global Bandages market size was valued at USD 175.9 million in 2023 and is forecast to a readjusted size of USD 210.2 million by 2030 with a CAGR of 2.6% during review period.

A bandage is a piece of material used either to support a medical device such as a dressing or splint, or on its own to provide support the movement of a part of the body. When used with a dressing, the dressing is applied directly on a wound, and a bandage used to hold the dressing in place. Other bandages are used without dressings, such as elastic bandages that are used to reduce swelling or provide support to a sprained ankle. Tight bandages can be used to slow blood flow to an extremity, such as when a leg or arm is bleeding heavily.
