Abstracts

In the banking, financial services, and insurance (BFSI) sector, smart cards are used as credit or debit cards, authentication cards for payments, fuel cards, access control cards, and high-security identification cards. They can be used as electronic wallets by loading the smart card with funds that can be transferred to a vending machine or an account using cryptographic protocols.

Scope of the Report:

This report studies the Banking and Financial Smart Cards market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Banking and Financial Smart Cards market by product type and applications/end industries. The strong need to reduce identity duplication will be the key driver for the growth of this market. Due to advances in technology, the number of fraudulent activities and forgeries are increasing. As a result, the cards and payments industry has undergone a digital transformation with the introduction of new payment methods such as EMV chips, personal identification number (PIN) cards, and mobile wallets. Since the data available in smart cards is difficult to decode, they will have a higher adoption rate in the BFSI sector.
