A barcode printer is a specialized printer. The biggest difference between barcode printers and ordinary printers is that the printing of barcode printers is based on heat, using carbon ribbon as the printing medium (or directly using thermal paper) to complete the printing. The biggest advantage of this printing method compared to ordinary printing methods because it can achieve continuous high-speed printing without supervision. The content it prints is generally the company's brand logo, serial number logo, packaging logo, barcode logo, envelope label, clothing tag, etc.
