Abstracts

According to our (Global Info Research) latest study, the global Bare Metal Stents market size was valued at USD 623.5 million in 2023 and is forecast to a readjusted size of USD 740.6 million by 2030 with a CAGR of 2.5% during review period.

This report studies the Bare Metal Stent market. Bare metal stents are usually metal and have no special coating. They act as scaffolding to prop open blood vessels after they are widened with angioplasty. As the artery heals, tissue grows around the stent, holding it in place. However, sometimes an overgrowth of scar tissue in the arterial lining increases the risk of re-blockage. It is a mesh-like tube of thin wire. The first stents licensed for use in cardiac arteries were bare metal - often 316L stainless steel. More recent stents use cobalt chromium alloy.

Global Bare Metal Stents key players include Abbott Vascular, Medtronic, Boston Scientific, Terumo, etc. Global top four manufacturers hold a share over 70%.

North America is the largest market, with a share about 50%, followed by Europe, and Japan, both have a share over 30 percent.

In terms of product, Co-Cr Stent is the largest segment, with a share nearly 80%. And in terms of application, the largest application is For Large Vessel, followed by For Small Vessel.
