Abstracts

Obesity is a medical condition which occurs due to excessive fat accumulation leading to adverse effect on health. Few of the prime reason for obesity are excessive food intake, less physical exercise and genetic susceptibility. According to the World Health Organization (WHO), the body mass index (BMI) greater than or equal to 25-30 kg/m² is known as overweight, and BMI greater than or equal to 30 kg/m² is considered as obesity. According to the WHO, globally, around 1.8 billion adults are overweight, and around 600 million of them were obese in 2014. In addition, around 40 million children below the age of five years were overweight. Bariatric surgery is one of the best treatment option for obesity and overweight.

SCOPE OF THE REPORT:

This report studies the Bariatric Surgical Procedures market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Bariatric Surgical Procedures market by product type and applications/end industries. Increasing obese population due to the rise in lifestyle diseases and sedentary lifestyle is one of the key factors to drive the global bariatric surgical procedures market over the forecast period 2017-2027. Similarly, growing trend of body toning and grooming therapy would have a greater importance on the aesthetic appearance leading to the market growth. Furthermore, increasing healthcare expenditure for obesity management, strategic collaborations among devices manufacturers and bariatric surgery service providers are also anticipated to fuel the growth of this market over the forecast period. The increasing spending on healthcare per capita for quality patient care and various advanced treatments also boost the growth of the global bariatric

surgical procedure market. However, the post-surgical complications and the cost associated with bariatric surgery might hamper the growth of the global bariatric surgical procedures market. On the other hand, the availability of weight management medications and other alternatives might lead to the decreasing growth rate of the market.

The global Bariatric Surgical Procedures market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Bariatric Surgical Procedures.
