Barrel Bandage is a medical product used to dress and immobilize wounds. It's usually a tube of soft, stretchy fabric that can be stretched and pulled over the body part for support and protection. Barrel bandages are usually made of cotton or elastic fabric for breathability and comfort. It is designed in a cylindrical shape, which can adapt to the curves of different parts of the body. Barrel bandages can be used to immobilize wounds, protect wounds, relieve pressure on muscles or joints, and provide light compression support. This kind of bandage is often used for dressing in sports injuries, joint sprains, muscle strains and other situations.
