Abstracts

Basalt fiber sleeve is a biaxial braid of precisely oriented fine basalt fiber yarns of maximum stiffness, tortuosity stability and compressive strength, withstanding continuous working temperature up to 800°. The sleeve resistant most acids, alkalis and is unaffected by most bleaches, solvents. With outstanding properties of electrical insulation, high temperature resistance, and shock resistance. Due to its braided structure, the diameter of this sleeve can be changed by stretching or compressing, flexible for installation. It is the best insulation and protecting solution in extreme working environment. Basalt Fiber Sleeve is a 100% inorganic, mineral, continuous filament with an excellent high temperature and shock resistance. Basalt fiber is similar to carbon fiber and fiberglass, but basalt has better mechanical properties than fiberglass and is lower in cost than carbon fiber. The Basalt Fiber Sleeve is easy to install and will provide years of protection and good looks. Basalt Fiber Sleeve is a highly conformable sleeve which provides excellent thermal protection for engine and generator exhaust piping for automobiles, marine engines and generators, bus, construction and mining equipment.
