Base metals such as copper, aluminum, zinc, nickel, and lead play a major role in the development of manufacturing, utilities, infrastructure, and construction sectors. Growth across these industries directly implies the growth of the base metal mining market as well. In the past few years, developing as well as developed regions have exhibited excellent development across areas such as urbanization, industrialization, and economic development. These factors have substantially increased the global consumption of base metals, providing momentum to mining activities.

North America is expected to contribute significantly towards the market growth owing to rising demand for base metals in the construction and infrastructure sector primarily in the U.S. and Canada. Moreover, easy availability, revival of North American economy and advancement in technologies are expected to act as key drivers for the base metal mining market. Asia Pacific is anticipated to witness substantial growth on account of rapid infrastructure development and industrialization in emerging countries including China and India. Europe is expected to witness moderate demand for base metals over the next seven years pertaining to growth in the electronics industry where it is used as a corrosion-free material. High production of base metals in Latin American countries including Peru, Venezuela and Brazil is expected to augment the market growth over the next seven years. Untapped resources in MEA are anticipated to provide mining companies with an opportunity to expand their operations thus leading to market growth.
