According to our (Global Info Research) latest study, the global Base Metals market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A base metal is a common and inexpensive metal, as opposed to a precious metal such as gold or silver. A long-time goal of alchemists was the transmutation of a base (low grade) metal into a precious metal. In numismatics, coins often derived their value from the precious metal content; however, base metals have been also used in coins in the past and today.

Silver's improvement is reflected in our headline chart above, having risen by 6.6% since the December 2017 low against gold's rise of only 4.5%.

The Global Info Research report includes an overview of the development of the Base Metals industry chain, the market status of Building & Construction (Copper, Zinc), Industrial Machinery & Equipment (Copper, Zinc), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Base Metals.
