## Abstracts

According to our (Global Info Research) latest study, the global Basketball Wheelchair market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The basketball wheelchair has two large wheels with a maximum diameter of no more than 66 cm and a number of small wheels, and each large wheel is equipped with a hand wheel with a diameter of 60 cm. The two big wheels of the basketball wheelchair are not perpendicular to the ground, but in the shape of 'eight', and the inclination angle between the big wheels and the ground is about 45°. This design not only reduces the center of gravity of the wheelchair, but also increases the stability of the wheelchair.

This report is a detailed and comprehensive analysis for global Basketball Wheelchair market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:
