A bath ball is a spherical blend of fragrant and soothing oils and extracts that you throw into your tub before bathing. Its main ingredients are sodium bicarbonate (baking soda) and citric acid, which are the ones responsible for the fizzing effect that bath bombs create. When you drop the bath bomb into the water, this reaction will happen and cause the bath bomb to dissolve completely and release all the goodies inside, from the awesome fragrance to skin-smoothing emollients, which helps soften the skin.
