## Abstracts

Inverters, also known as power regulators, can be classified into two types, stand-alone power supplies and grid-connected power supplies, depending on the use of the inverter in photovoltaic power generation systems. According to the waveform modulation method, it can be divided into a square wave inverter, a staircase wave inverter, a sine wave inverter, and a combined three-phase inverter. For inverters used in grid-connected systems, they can be divided into transformer-type inverters and transformer-less inverters according to transformers.
