According to our (Global Info Research) latest study, the global Battery Disconnect Unit (BDU) market size was valued at USD 1672 million in 2023 and is forecast to a readjusted size of USD 6025.2 million by 2030 with a CAGR of 20.1% during review period.

A Battery Disconnect Unit (BDU) is a device used to disconnect an automobile's battery from the electrical system. It is commonly used in situations where the vehicle needs to be stored for extended periods or is not in use for an extended period. The BDU can also be used as an anti-theft measure. The unit disconnects the battery by breaking the electrical circuit between the battery and the vehicle's electrical system. This prevents the battery from being drained and prolongs its life. The unit can be manually activated or remotely controlled through a mobile application.
