Battery liquid cooler is a cooling device that uses liquid as a cooling medium and is mainly used in the heat dissipation system of battery packs. It injects liquid coolant into the battery pack and uses the circulation of the liquid coolant to take away the heat generated by the battery pack, thereby reducing the operating temperature of the battery and improving the performance and service life of the battery. Liquid cooler has the advantages of high cooling efficiency, uniform heat dissipation, and low noise, and is an important component of battery thermal management.
