The global Battery Pole Piece Laser Cleaning Machine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The battery pole piece laser cleaning machine is a device specially used to remove dust and impurities on the surface of the battery pole piece. During the battery manufacturing process, dust and impurities on the surface of the pole pieces will affect the performance and stability of the battery, so cleaning is required. The laser powder cleaner uses a high-energy laser beam to scan the surface of the pole piece to instantly evaporate or burn dust and impurities to achieve the cleaning effect. The laser powder cleaner is efficient, precise and non-contact, and can effectively remove contaminants on the surface of the pole piece and improve the quality and performance of the battery.
