## Abstracts

The global Battery-powered LoRaWAN GPS Tracker market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Battery-powered LoRaWAN GPS tracker is a device that uses a Global Positioning System (GPS) receiver to determine its location and LoRaWAN technology to transmit that location data wirelessly over long distances to a LoRaWAN network server. LoRaWAN is a low-power, wide-area network (LPWAN) technology that enables long-range wireless communication with low power consumption. This makes it an ideal technology for battery-powered GPS trackers, which need to transmit location data regularly without draining the battery quickly.
