According to our (Global Info Research) latest study, the global Battery Separators Film market size was valued at USD 2307.9 million in 2023 and is forecast to a readjusted size of USD 6937.1 million by 2030 with a CAGR of 17.0% during review period.

This report studies the Battery Separator Films market.

A separator is a permeable membrane placed between a battery's anode and cathode. The main function of a separator is to keep the two electrodes apart to prevent electrical short circuits while also allowing the transport of ionic charge carriers that are needed to close the circuit during the passage of current in an electrochemical cell

The downstream of the lithium battery separator film is rigid, which is widely used in the consumer electronics, power vehicle, electric power storage and industrial use etc. fields. Consumer electronics field and power vehicle were the major field which account for approximately 83%.

As the Chinese lithium battery separator film capacity was put into production in large quantities, the global separator film market concentration suffered decline. Asahi Kasei (including Celgard), Senior Tech and Toray occupied a 35% share of the global sales market, after acquired Celgard, the share of Asahi Kasei may reach 22% globally. Asahi Kasei, Toray, SK Innovation, Senior Tech and Zhongke Sci & Tech as the top five companies accounted for 49%, while Senior Tech, Zhongke Sci & Tech from China got more than 13% of the global production.
